## NLT Financial Freedom Concept

NeverLossTrading® identifies institutional activities on all time-periods, plotting high probable trade entries and exits on the chart for you to follow right along with, constantly making money on up- and down-moves.

Institutions control more than 85% of all markets. With NeverLossTrading®, you learn to identify and trade a core set of financial instruments in focus.

See and experience which of the 42,000 shares exchanged in the US-market receive special attention.

When an institutional move is identified, we do the most ingenious and trade right along with it.

Your Financial Freedom Concept; Identify and Trade:

- Assets with significant institutional buying or selling activities.
- Assets that are setting up for a potential price breakout.

“See where prices go, enter and exit fast, beating the big money by speed.”

### 5. Indexes, Commodities, Currencies, Treasuries

Which currency pairs, futures, ETF's show NLT trade signal alignments for up-, down or sideways moves?

Is gold rising? What are Index futures doing?

The NLT Opportunity Report" provides answers: Identifying symbols, potential entries and exits, for you to verify with the NeverLossTrading® charts and trade along after.

## NeverLossTrading® Indicators

**SPU:** Speed Unit, measures the expected price move of the share per observed time unit.

**Top-Line-Indicator:** Points out strong price setups for directional trades.

**HF-Indicators:** To trade momentum changes, tops and bottoms.

**TradoMeter:** Measures the short term momentum price move and direction.

**CommandoGraph:** Trend indicator.

**Light Tower:** Indicates strong price moves for trade entries.

**Price/Volume:** Points out price-volume trade entry and exit combinations.

**Volatility:** Is measured to identify when a price move is setting up and when it happens.

Combining and overlaying NLT- indicators gives us strong directional trade propositions.

By our "3 Days to Financial Freedom Classes" combined with a 3/6-month follow-up mentorship, where our students learn to understand and apply Never Loss Trading.

Our charts are unique and easy to read:

**Blue:** Indicates upwards price moves.

**Red:** Stands for downwards moves.

**Purple Zones:** Identify indecision. Hence, we mostly stay out of a trade when a Purple Zone is painted on the screen. In Purple Zones, we expect counter trend activities, which only allow for scalping and not for trend trading.

Receive hundreds of pages of trade situations captured and documented for you.

## Spot Stocks Ready for a Price Move. Know Your Entries and Exits (magnify the above report for more details)

A key to successful trading is to find shares which setup for a strong directional price move.

We solve this challenge for you by providing reports on favorable NeverLossTrading chart setups, indicating:

### A) Clearly Defined Entries

Trade entries happen when the candle, following the directional-indication candle, confirms the move by taking out a clearly formulated price threshold.

### B) Clearly Defined Exits

Expected minimum price moves are expressed in relation to the average expected price move per time unit, which we call SPU (Speed Unit).

### C) Stop-/Adjustment Levels

With the help of the NLT-Indicators, you know for every trade the price level where the directional assumption will no more hold true and you learn how to either use an NLT-trade-adjustment method or leave the trade at an acceptable risk.

### D) Learn and Apply Multiple Trading Strategies

Option trades are often considered risky. In contrary, when applied right, option trades have defined advantages over trading the shares by being able to limit the risk of a trade. Highlighted option trading examples are:

- Selling Puts below a found support level and potentially cover at a lower strike price.
- Selling Calls above a resistance level and potentially cover by a higher strike Call.
- Trend trades: Single option trades, debit Put- and Call-spreads.
- Option trades which cover a trading range like Condors and Butterflies.

All above mentioned and many more trading strategies are taught in the NeverLossTrading Mentorship-Programs.

Surely, you will also experience how to combine share- and option-trades. One example is our "Buy High, Sell Low – Make Money So –

Strategy", where we teach you to produce constant monthly income from shares, while we are protecting your initial equity position, with the ability to constantly adjust your trade by a protective shield in case of a price drop.

In addition to your live teaching sessions, you will receive a written documentation for all taught strategies, explaining how to administer and follow through with various trade strategies.

Our NeverLossTrading® documentations include:

- NLT Tutorial: How to use our indicators and trade setups.
- NLT Option Tutorial: The next dimension of option trading.
- NLT Futures Tutorial: All about trading Futures.
- NLT Special Trade Setups: Make use of our knowledge. Example: "NLT-Put-it-Down-Trade", where we bring the odds on our side by being able to make money if the share price goes up, moves sideways or slightly drops.
